

## Alaska Division of Agriculture Hemp Program

---

### Waste Disposal & Hemp Destruction

A registrant shall store, manage and dispose of any solid or liquid waste, including wastewater generated during industrial hemp or industrial hemp product production, processing, testing or retail sales, in compliance with applicable federal, state and local statutes, ordinances, regulations and other law.

Industrial hemp waste or industrial hemp product waste must be made unusable before leaving the registered premises. Industrial hemp waste or industrial hemp product waste includes the following:

- 1) Industrial hemp plant waste to include stalks, leaves, stems, flowers that have not been processed with a solvent.
- 2) Industrial hemp or Industrial hemp products that have been found unfit for sale or consumption.
- 3) Any industrial hemp or hemp products that have expired.
- 4) Industrial hemp or industrial hemp products that have failed testing under 11 AAC 40.600 – 11 AAC 40.665

Industrial hemp, industrial hemp product waste and failed industrial hemp processing batches may be made unusable and unrecognizable through mowing, grinding, or compacting the hemp or hemp product and incorporating the industrial hemp or industrial hemp product with at least an equal amount of other compostable or non-compostable materials listed as follows:

- 1) Food waste
- 2) Yard waste
- 3) Vegetable-based grease or oils
- 4) Paper waste
- 5) Cardboard waste
- 6) Plastic waste
- 7) Oil
- 8) Soil
- 9) Or another waste only when pre-approved by the division.

The results of the mixture must render the industrial hemp or industrial hemp product to the point it cannot be easily separated, sorted, usable nor recognizable.

As a registrant you are required to give notice to the division on this form not more than 10 business days after the disposal of industrial hemp or industrial hemp products.
