Comments:

STANDARD SAFEGUARDS OF PERMIT

1. All pests must be shipped in sturdy, escape-proof containers.
2. Upon receipt of pests, all packing material media, substrate, soil and shipping containers shall be sterilized or destroyed immediately after removing pests.
3. Pests shall be kept only within the laboratory or designated area at the permittee's address.
4. No living pests kept under this permit shall be removed from confined area except by prior approval from State and/or Federal regulatory officials if necessary.
5. Without prior notice and during reasonable hours, authorized State and/or PPQ regulatory officials shall be allowed to inspect the conditions under which pests are kept.
6. All pests kept under this permit shall be destroyed at the completion of the intended use, and not later than the expiration date, unless an extension is granted by this issuing office.
7. All necessary precautions must be taken to prevent escape of pests. In the event of an escape, notify this office.
8. Pests shall only be disposed of in a manner that renders them nonliving and nonviable. For smaller quantities freeze at least 24 hours, then compost or dry plants, then seal in a double plastic bag and dispose in the trash. For larger quantities, allow plants to dry completely then compost in areas away from waterbodies, or allow plants to dry then burn in accordance with all federal state, and local laws and ordinances.
